It is often overlooked that a fundamental inner harmonization of people with their surroundings cannot be achieved through decoration alone. Therefore, sound advice should be sought before every new home project. The first, most important decision is the arrangement of the room. The floor plan concept is fundamental to all subsequent designs. This first planning step sets the course for a harmonious future.

The 600-year-old wisdom of the Tao will help us to remember that the universe, with the earth in it, is our greater home, in which we have our houses and in which we live in our bodies. Everything is nested together like a Russian doll. Spirit Planning is like the invisible thread that holds everything together and brings it into harmony. You cannot see it, but it is there, woven into everything that surrounds you, the furniture, the walls, the trees, the birds, the minerals, the water, us humans. SpiritPlanning is like a symphony created in harmony and peace.

Together we will design your new home and make it a place that no longer turns its back on nature.

"The modern built world has turned its back on the soul and the forces of nature. We must look back into nature, into the hidden soul of nature, and from there we will find our way home."
